Applicant's election without traverse of the species of figs. 1-6, claims 1-4, in the reply filed on 8/23/04 is acknowledged.

Claims 5-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/23/04.

In the Image File Wrapper (IFW), only the front page of each Priority document is shown. Applicant must submit the entire documents.

Claims 1-4 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For clarity and/or definiteness, it appears that "to penetrate therein" (claim 1, line 7) should be moved to after "pad" (same line), that —said holes—should be inserted before "are" (claim 1, line 8), that —respectively—should be inserted before "guiding" (claim 1, line 9).

The following appear to lack sufficient antecedent basis (in the claim): "the approach" (claim 2).

In claim 4, it is not clear to what "lying" applies.

All claims should be revised carefully to correct all other deficiencies similar to the ones noted above. The non-elected claims should also be similarly corrected at the

same time so that the application can be allowed without delay should the generic claims become allowable.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
